

Christian Monyk

Austrian Research Centers - Quantum Technologies

Christian Monyk studied physics at the University of Vienna. After a short trip into semiconductor industry he spent more than three years as secretary general of the “Association of Austrian Technology Centers”, an organisation within Austria’s innovation policy. Subsequently he changed to the product management department of a mobile phone provider. In 2002 he joined the Austrian Research Centers where he built up the business unit “Quantum Technologies”. Together with his team he prepared and conducted the European research project SECOQC.
